PROFESSIONAL SUMMARY

Results-driven Frontend Developer with 1 year of real-world industry experience building and modernizing production-grade SaaS products and client-facing web applications. Proven expertise in React.js, Next.js, REST API integration, and real-time communication via WebSocket, gained through leading the UI rebuild of Textellent 3.0 — a B2B business SMS and marketing platform used across retail, healthcare, and real estate. Delivered a responsive, full-featured freelance website integrated with a headless CMS for a live client. Adept at translating Figma designs into scalable, reusable components within Agile workflows using Git, Jenkins CI/CD, and ClickUp. Committed to clean, maintainable code and continuously improving productivity with AI-assisted development tools.

TECHNICAL SKILLS

Frontend:

HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, TypeScript, Bootstrap 5, React Bootstrap, Tailwind CSS, Responsive Web Design

API & Data:

REST APIs, Axios, React Query, WebSocket

CMS:

Sanity CMS

Deployment:

Netlify, Vercel, Jenkins (CI/CD)

Backend & DB:

Node.js, Express.js, MongoDB

Authentication:

OAuth Bearer Token, Token-based Authentication

Version Control:

Git, GitHub, TortoiseGit

Tools:

Postman, Figma (via MCP Integration with Cursor), Cursor, Claude, Locofy AI, ClickUp, Jetty

PROFESSIONAL EXPERIENCE

Frontend Developer | Infario Technology

03/2025 – 02/2026 | Coimbatore

Project: Textellent 3.0 — Business SMS & Texting Platform (B2B SaaS, Irving, Texas)

- Led the complete UI rebuild of Textellent 3.0, migrating a legacy jQuery-based system to a modern React architecture, improving maintainability and scalability for enterprise clients
- Developed 20+ reusable React components across core modules — Login, Forgot Password, Messaging, and Campaign — based on Figma mockups
- Integrated REST APIs using Axios and React Query for efficient data fetching, caching, and real-time UI updates
- Implemented OAuth Bearer Token authentication for Textellent 3.0 and Token ID-based authentication for the legacy 2.0 system
- Integrated WebSocket for real-time messaging and Usetiful for guided in-app product tours
- Built responsive layouts using Bootstrap 5 and React Bootstrap across desktop and mobile viewports
- Streamlined Figma-to-code workflow using MCP integration with Cursor
- Validated and debugged API endpoints using Postman in collaboration with backend developers
- Participated in CI/CD deployment workflows using Jenkins and managed source code via Git, GitHub, and TortoiseGit
- Leveraged AI tools — Cursor, Claude, and Locofy AI — to improve development speed and code quality
- Tracked tasks and sprints using ClickUp in an Agile team environment

FREELANCE EXPERIENCE

Frontend Developer (Freelance) | Super Solar Power Fencing Technology

- Designed and developed a fully responsive business website covering Home, About, Products, Services, and Contact pages
- Built reusable UI components using Next.js, React, TypeScript, and Tailwind CSS
- Implemented product catalog with client-side search, hero carousel, service carousel, image galleries, and YouTube embeds using Swiper
- Integrated Sanity CMS for independent client content management
- Optimized images using Next.js Image component and added smooth animations with Framer Motion
- Deployed on Vercel with optimized build configuration

Technologies: Next.js, React, TypeScript, Tailwind CSS, Sanity CMS, Framer Motion, Swiper, Lucide Icons, Git, GitHub

PROJECTS

Textellent 3.0 — Business SMS & Texting Platform | [Preview](#)

Infario Technology | React, Axios, React Query, WebSocket, Bootstrap 5

- Production-grade SaaS platform for SMS marketing, automated campaigns, and real-time customer conversations serving retail, healthcare, and real estate industries
- Rebuilt entire frontend from legacy jQuery to modern React architecture with 20+ reusable components, WebSocket messaging, and OAuth authentication

Super Solar Power Fencing Technology — Business Website | [Preview](#)

Freelance | Next.js, TypeScript, Tailwind CSS, Sanity CMS, Framer Motion

- Responsive business website with product catalog, client-side search, image galleries, and Sanity CMS integration for independent content management
- Optimized performance using Next.js Image and enhanced UX with Framer Motion animations
- Github: https://github.com/preethi-kuselakumar/super_solar_fencing

Personal Portfolio | [Preview](#)

React.js, Netlify

- Designed and developed a personal portfolio from scratch to represent my professional identity online, featuring smooth animations, mobile-friendly layout, and a built-in resume preview and download option
- Github: <https://github.com/preethi-kuselakumar/Portfolio>

Additional Projects

CRUD operation, Weather App

- CRUD application built with MERN Stack covering full API-to-frontend development lifecycle
- Weather App built with React.js consuming OpenWeather REST API for live weather data
- Github: <https://github.com/preethi-kuselakumar>

EDUCATION

Bachelor of Commerce in Corporate Secretaryship

Sri Ramakrishna College of Arts and Science
CGPA: 8.1

2021 – 2024 | coimbatore

CERTIFICATION

MERN Stack Development — Institution: KGISL MicroCollege | **Front-end:** HTML, CSS, JavaScript, React
| **Back-end:** Node.js, Express, MongoDB
